

Avoid Risk and Costly Lawsuits that Damage Your Brand and Your Bottom Line

A recent Forrester study, commissioned by HR Acuity to determine the Total Economic Impact of our solution, determined that quantifiable key benefits include reduced expected employee relations case litigation costs.

HR Acuity helps companies avoid potential litigation by helping the employee relations (ER) team identify hot spots and problem areas early and take proactive measures to correct the underlying causes.

How does HR Acuity help your company to mitigate legal risk?

- Reporting and dashboards allow ER professionals to identify areas of concern and take proactive steps to correct issues.
- Consistency with checks and balances in place to ensure that employees in similar situations are treated the same. ER professionals can quickly search the HR Acuity database to gather historical data and find precedent cases.
- Employees who feel that they have been heard and treated fairly by their employer are less likely to file an external claim.
- Critical data is easily accessible in one convenient location and can be shared, even years later, with internal and external counsel for proactive review to identify potential disparate action or to prepare a successful defense.

The HR Acuity technology platform helps HR, ER and related professionals to document employee performance and behavioral issues, and conduct investigations into higher risk issues, such as harassment and discrimination. The solution ensures that all employees are treated fairly and consistently, mitigating the risk of potential discrimination claims.
